about Karl Steinbuch

Bildungspolitik: die IT-Herausforderung

The Energy Consumption of vN Computers will become unaffordable

Activities

KARL: the World's leading Hardware Description Language during the 80ies

Fig. 2: The World's first complete VLSI Design Framework: KARL-based

The first graphic hardware design language

Fig. 7: Shuffle Sort Algorithm

The Domino Notation

Introducing the Mead-&-Conway Revolution to the Continent (EurAsia)

Trailblazing the use of Term Rewriting (TR) for Synthesis in EDA

Speed-up by 4 orders of magnitude: 15 Years earlier than Mainstream

Introducing Structured VLSI Design

How to Cope with the Power Wall

Why we need to reinvent Computing

Why we again need to reinvent Computing

How CHDL, the World's only fully competent Conference Series about Hardware Description Languages has been killed

Der Stromverbrauch von vN Computern wird unbezahlbar werden
